Disclaimer

The information in this document (hereinafter called “Information”) is subject to change without notice.

Macnica Inc. (Developer) makes no warranty of any kind regarding this document, or of any liability arising out of the application or use of information in this document, and assumes no responsibility for any errors that may appear in this document.

This document is distributed without any charge and reselling or copying without written authorization by Developer is restricted.

IN NO EVENT WILL DEVELOPER BE LIABLE FOR ANY CONSEQUENTIAL, INDIRECT, EXEMPLARY, SPECIAL, OR INCIDENTAL DAMAGES, INCLUDING ANY LOST DATA AND LOST PROFITS, ARISING FROM OR RELATING TO YOUR USE OF THE INFORMATION, EVEN IF YOU HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. THE TOTAL CUMULATIVE LIABILITY OF DEVELOPER IN CONNECTION WITH YOUR USE OF THE INFORMATION IN THIS DOCUMENT, WHETHER IN CONTRACT OR TORT OR OTHERWISE, WILL IN NO EVENT EXCEED THE AMOUNT OF FEES PAID BY YOU TO DEVELOPER HEREUNDER FOR USE OF THE INFORMATION. YOU ACKNOWLEDGE THAT THE FEES, IF ANY, REFLECT THE ALLOCATION OF RISK SET FORTH IN THIS AGREEMENT AND THAT DEVELOPER WOULD NOT MAKE AVAILABLE THE INFORMATION TO YOU WITHOUT THESE LIMITATIONS OF LIABILITY.

The Information is not intended for use in the development of on-line control equipment in hazardous environments requiring failsafe controls, such as in the operation of nuclear facilities, aircraft navigation or communications systems, air traffic control, life support, or weapons systems (“High-Risk Applications”). Developer specifically disclaims any express or implied warranties of fitness for such High-Risk Applications. You represent that use of the Information in such High-Risk Applications is fully at your risk.

1. Read This First

1.1 Important Information

READ FIRST:

- Before using this card, be sure to read this Getting Started manual.
- Keep this Getting Started manual so you can refer to it when necessary.
- You should sufficiently understand the card's configuration before you use it.

Card Application:

- This card is a High Speed Mezzanine Card (hereafter HSMC) daughter card that can be connected to and used with any HSMC that complies with HSMC standard. Combining with an FPGA evaluation board (hereafter Evaluation board), this card supports the development and verification of hardware and software for 2 ports of Gigabit Ethernet i/o interface. Use this card correctly in line with the application.

People Who Are Expected to Use This Card:

- Only people who carefully read and understood this manual and the Reference Manual should use this card. You need a fundamental understanding of FPGA, logic circuits, electronic circuits, and micro-computers to use this card.

Precautions When Using This Card:

- This card is a development support card used for the purpose of your hardware and software development and evaluation. This card cannot be used in your mass production products. Furthermore, when you want to use the card's sample designs for your products, please be sure to confirm if it withstands practical use at your own risk by doing necessary and sufficient tests and evaluations.
- Macnica Incorporated (hereafter Macnica Inc.) has no liability for any results arising from the use of the card.
- Macnica Inc. will attempt to provide either free or paid support to handle repair of faults or workarounds for faults with the card. This does not mean, however, that Macnica Inc. guarantees to provide a workaround or fix under all circumstances.
- Macnica Inc. cannot anticipate every possible circumstance that might involve a potential hazard. The warnings and precautions in this Getting Started manual and on the card are therefore not all-inclusive. You are responsible for using the card correctly and safely.
- Even if there are faults with devices that are mounted on the card, Macnica Inc. will not replace it with a fault-fixed device.
- Each interface is not guaranteed to connect with all products.
- The card will not be replaced if you damaged or modified the card.
- The card uses lead-free parts.
- The rights to the trademarks and registered trademarks of the vendors noted in this manual belong to their respective vendors.

Improvement Policy:

- Macnica Inc. pursues a policy of continuous improvement in design, performance, and safety of the product.
Macnica Inc. reserves the right to change, wholly or partially, specifications, designs, this Getting Started manual, and other documentation at any time, without prior notice to customers.

Warranty:

- Macnica Inc. offers to exchange this card free of charge only in case of initial malfunction noticed by you within 30 days from the delivery.
Macnica Inc. cannot exchange cards in cases where the malfunction is caused by the following reasons:
 - (1) Misuse, abuse of the card or use under abnormal conditions
 - (2) Remodeling or repair
 - (3) A fire, earthquake, fall or other accidents

Figures:

- Some figures in this manual may differ from your purchased card.

1.2 Developer Information

The Developer of this card is:

Macnica Inc.

1-6-3 Shin-Yokohama, Kouhoku-ku, Yokohama, 222-8561 JAPAN

1.3 Inquiries

In case you have any inquiries about the use of this card, please contact sales office you purchased or make inquiries through the contact form on the following web site.

Inquiries page:

<http://www.m-pression.com/contact/inquiry>

Inquiries to:

Macnica Inc.

Sales and Planning Advanced Technology

1-5-5 Shin-Yokohama, Kouhoku-ku, Yokohama, 222-8563 JAPAN

TEL: +81-45-470-9838

2. For Ensuring Safe Use

Be sure to follow the instructions given in this Manual which are intended to prevent harm to the user and others as well as material damage.

2.1 Legend

 Danger	Indicates an imminent hazardous situation which if not avoided will result in death or serious injury.
 Warning	Indicates a potentially hazardous situation which if not avoided could result in death or serious injury.
 Caution	Indicates a potentially hazardous situation which if not avoided may result in minor or moderate injury or in property damage.

2.2 Cautions

 Danger	<p>If an AC adapter is needed, be sure to use the AC adapter provided in the package or one that meets the specifications described in this manual. Using an AC adapter not meeting the specifications described in this manual may cause the card to emit heat, explode, or ignite.</p>
 Warning	<p>Do not apply strong impacts or blows to the card. Doing so may cause the card to emit heat, explode, or ignite, or the equipment in the card to fail or malfunction. This may also cause fire.</p>
	<p>Do not put this card or the AC adapter in cooking appliances such as microwave ovens, or high-pressure containers. Doing so might cause this card or AC adapter to emit heat, explode, ignite, or emit smoke, or its parts to break or warp.</p>
	<p>Do not cover or wrap this card that is in use with cloth or other materials that are likely to allow heat to build up inside the wrapping. This will cause heat to build up inside the wrapping which may cause this card to ignite or malfunction.</p>
	<p>When disposing of this card, do not dispose of it along with general household waste. Throwing this card into fire may cause it to explode. Dispose of this card following the laws, regulations, and ordinances governing waste disposal.</p>
	<p>Do not pull the power supply cable with excessive force or place heavy items on it. Do not damage, break, bundle, or tamper with the power supply cable. Damaged parts of the power supply cable might cause a short circuit resulting in fire or accidents involving electrical shock.</p>
	<p>Do not plug or unplug the power plug with wet or moist hands. This might cause injuries or equipment malfunctions or failures due to electrical shock.</p>

<div style="text-align: center;">  <p>Warning (Continued from previous page)</p> </div>	<p>Plug the power plug securely into the outlet. If the power plug is not securely plugged into the outlet, it may cause accidents involving electrical shock or fire due to heat emitted.</p> <p>Do not connect many electrical cords to a single socket or connect an AC adapter to an outlet that is not rated for the specified voltage. Doing so may cause the equipment to malfunction or fail, or lead to accidents involving electrical shock or fire due to heat emitted.</p> <p>Periodically remove any dust accumulated on the power plug and around the outlet (socket). Do not use a power plug with dust accumulated on it because doing so will lead to insulation failure due to moisture which may lead to fire. Remove any dust on the power plug and around the outlet with a dry cloth.</p> <p>Do not place any containers, such as cups or vases, filled with water or other liquids on the card. If the card is exposed to water or other liquids, it will cause a malfunction or electric shock. If you spilled water or other liquid on this card, immediately stop using the card, turn off the power, and unplug the power plug. If you have any requests for repairs or technical consultation, please contact sales office you purchased or Mpression inquiry URL.</p> <p>Keep the card and accessories out of the reach of children. Failure to do so may lead to injuries.</p>
<div style="text-align: center;">  <p>Caution</p> </div>	<p>Do not place the card on unstable places such as shaky stands or tilted locations. Doing so may cause injuries or cause this card to malfunction if the card should fall.</p> <p>Do not attempt to use or leave the card in places subject to strong direct sunlight or other places subject to high temperatures such as in cars in hot weather. Doing so might cause the card to emit heat, break, ignite, run out of control, warp, or malfunction. Also, some parts of the equipment might emit heat, causing burn injuries.</p> <p>Do not use the card in places subject to extremely high or low temperatures or severe temperature changes. Doing so may cause the card to fail or to malfunction. Always be sure to use the card within a temperature range of 5°C to 35°C and a humidity range of 0% to 85%.</p> <p>Unplug the power supply when doing maintenance on equipment in which the card is embedded. Failure to do so may lead to accidents involving electrical shock.</p> <p>Do not place the card in locations where excessive force might be applied to it. Doing so may cause the printed circuit board to warp, leading to breakage of the printed circuit board, missing parts or malfunctioning parts.</p>

 <p>Caution (Continued from previous page)</p>	<p>When using the card together with expansion boards or other peripheral equipment, be sure to carefully read each of their manuals and to use them correctly.</p> <p>Developer does not guarantee the operation of specific expansion boards or peripheral devices when used in conjunction with this card unless they are specifically mentioned in this Manual or their successful operation with this card has been confirmed in separate documents.</p>
	<p>Turn off the power switch when moving or connecting the card.</p> <p>Failure to do so may cause this card to fail or lead to accidents involving electrical shock.</p>
	<p>Do not clean this card by using a rag containing chemicals such as benzine or thinner.</p> <p>Doing so could degrade the card. When using a chemically treated cloth, comply with its directions and warnings.</p>
	<p>Do not immediately turn on the power if you find that moisture has condensed onto this card after removing it from the box.</p> <p>Condensation may form if the card is cold when moved from the box into a warm room.</p> <p>Turning on the power while there is moisture on the card may cause it to malfunction or shorten the service life of the parts.</p> <p>Allow the card to reach room temperature when you first take it out of the box. If condensation or moisture has occurred on this card, first wait for the moisture to fully evaporate before installing or connecting the card to other equipment.</p>
	<p>Operation of the card cannot be guaranteed if it has been disassembled, dismantled, altered, modified, or rebuilt.</p>

3. Advance Preparation

3.1 About This Manual

This manual describes how to use the reference design that this card is used in. The following information is also included.

- Basic specifications of the card
- Sample designs for implementations using the card and Macnica's Nitro – Cyclone® V GX I/O expansion base board

3.2 Advance Preparation

A. Preparation of reference design

The following items are included in the reference design that is provided.

- Reference Designs (sof files and elf files)
- Board information

The following items are included in the board information.

- Circuit diagram

To download these files, go to the URL noted on the “Packing List and Precautions”.

B. Preparation of materials

Prepare the following materials to execute all of the functions of this design.

- This card: 1
- Macnica's Nitro – Cyclone® V GX I/O expansion base board (hereafter called the Nitro board): 1
- USB Blaster: 1
- LAN cable (CAT5e or better): 1
- Computer for evaluations (Windows 7)

C. Preparation of tools

Prepare the following tools before operating this design.

- Altera Quartus Prime 16.1 Standard Edition
- NiosII EDS 16.1

4. Reference Design

4.1 About Reference Design

4.1.1 Ping Test from Evaluation Computer

Input the ping command from the evaluation computer and then confirm the response from the Nitro board via the IEEE1588 GE card.

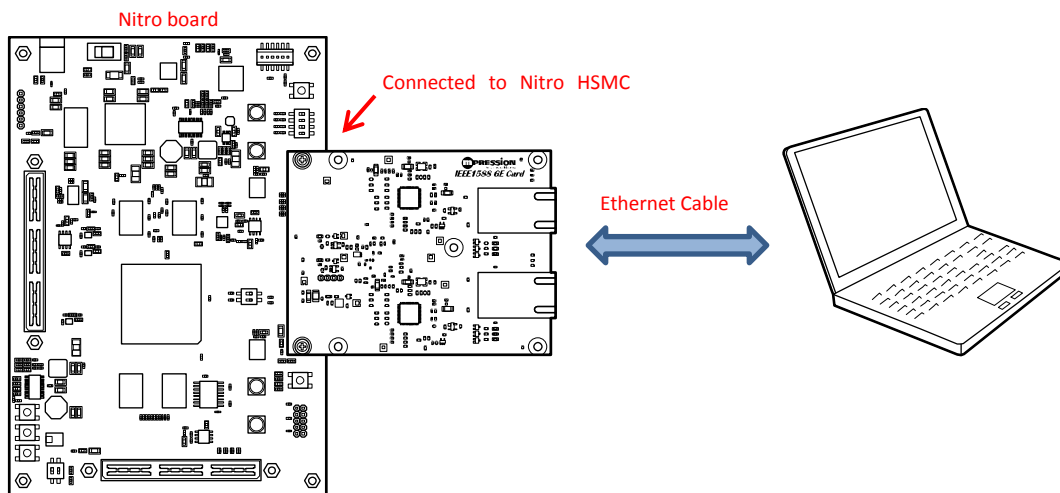

Figure 4-1 Connection Diagram for Ping Test for IEEE1588 GE Card

Table 4-1 Reference Design for IEEE1588 GE Card Ping Test

File name	Description	Ping test target
sof_download_ch0.bat(sample_design.sof)	Design for FPGA	Ethernet port 0
nios_download_ch0.bat(sss.elf)	FW design for Nios	
sof_download_ch1.bat(sample_design.sof)	Design for FPGA	Ethernet port 1
nios_download_ch1.bat(sss.elf)	FW design for Nios	

5. Setup

5.1 Card Layout

This section explains the card layout and major components.

Figure 5-1 and Figure 5-2 show the layout of the card.

Figure 5-1 IEEE1588 GE Card Layout (Front)

Figure 5-2 1588 IEEE1588 GE Card Layout (Back)

Table 5-1 IEEE1588 GE Card Connectors

No.	Reference	Functions	Details
1	CN3	Ethernet port 0 RJ45	Belfuse 0826-1G1T-43-F
2	CN5	Ethernet port 1 RJ45	Belfuse 0826-1G1T-43-F
3	CN1	Interface for ALTERA FPGA Development Board High Speed Mezzanine Card (HSMC) connector	Samtec ASP-122952-01

5.2 Card Setup and Ping Test

Before startup, set up the card, Evaluation board and the evaluation computer as shown below. The following shows the set up method for doing a ping test through port 0.

5.2.1 Network Settings on the Evaluation Computer

Do the network settings on the evaluation computer. (*The settings may vary according to the computer's environment.)

Once you implement these settings, they are not needed after that.

- 1) Input the following command in Command Prompt.

```
> netsh interface ipv4 show interface
```

The following information is displayed.

Idx	Met	MTU	State	Name
1	50	4294967295	connected	Loopback Pseudo-Interface 1
12	25	1500	connected	Wireless Network Connection
11	30	1500	connected	Local Area Connection
14	50	1500	disconnected	Bluetooth Network Connection
15	5	1400	disconnected	Local Area Connection* 11

The name of the interface being used at this time appears in "Local Area Connection". (LAN port of computer)

- 2) Input one of the following commands.

```
> netsh interface ipv4 set neighbors 11 192.168.1.234 00-07-ed-ff-e1-ae
```

or

```
> netsh interface ipv4 set neighbors Local Area Connection 192.168.1.234 00-07-ed-ff-e1-ae
```

- 3) To confirm, execute the following command.

```
> arp -a
```

The following information is displayed.

```
Interface: 192.168.1.1 --- 0xb
```

Internet Address	Physical Address	Type
192.168.1.234	00-07-ed-ff-e1-ae	static
192.168.1.255	ff-ff-ff-ff-ff-ff	static
224.0.0.22	01-00-5e-00-00-16	static
224.0.0.251	01-00-5e-00-00-fb	static
224.0.0.252	01-00-5e-00-00-fc	static

<==== Confirm that this information is displayed.

The network setup is complete.

5.2.2 Ping Test

- 1) Turn off the power to the Nitro board.
- 2) Use the Ethernet cable to connect the card's Ethernet port 0 (CN3) to the evaluation computer.
- 3) Use the USB Blaster cable to connect the Nitro JTAG port and the evaluation computer.

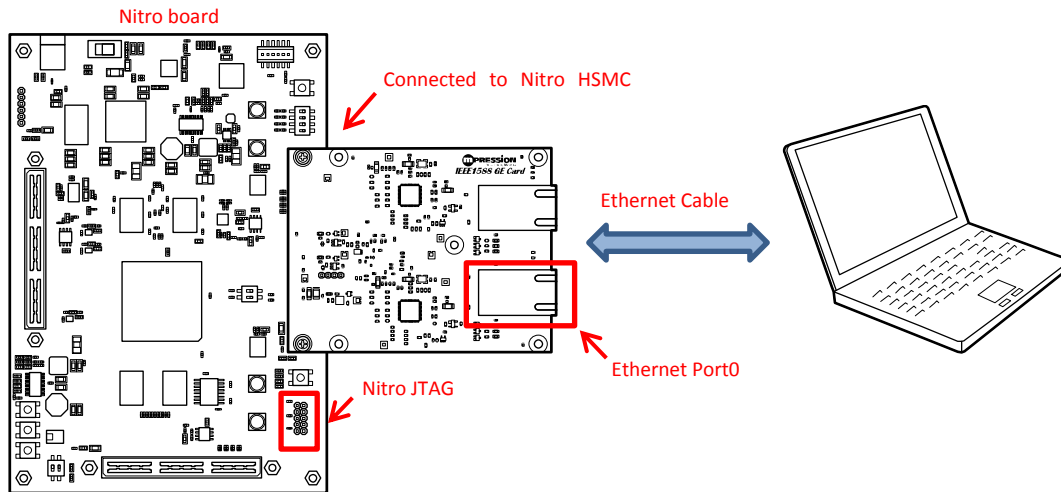

Figure 5-3 Nitro Board and IEEE1588 GE Card Assembly

- 4) Turn on the power to the Nitro board.
 - 5) Open Command Prompt in Windows 7.
 - 6) Execute the “sof_download_ch0.bat”(*1) file that is in \sof_elf_ch0, and then configure a test design on the FPGA.
- (*1. Edit the bat file according to the installation environment of the NiosII EDS 16.1.)

```

C:\design\1588_GE_Card\sof_elf_ch0>echo off
Searching for SOF file:
in .
./sample_design.sof

Created "simple socket server" task (Prio: 4)
```

Figure 5-5 Executing nios_download_ch0.bat

- 8) Execute the following command and confirm that a ping is returned from the Nitro board.

```
> ping -l 1024 192.168.1.234
```

Operations are normal if the response is similar to the following.

Pinging 192.168.1.234 with 1024 bytes of data:

Reply from 192.168.1.234: bytes =1024 time =128ms TTL=64

Reply from 192.168.1.234: bytes =1024 time =353ms TTL=64

Reply from 192.168.1.234: bytes =1024 time <1ms TTL=64

Reply from 192.168.1.234: bytes =1024 time =189ms TTL=64

Ping statistics for 192.168.1.234:

Packets: Sent = 4, Received = 4, Lost = 0 (0% loss),

Approximate round trip times in milli-seconds:

Minimum = 0ms, Maximum = 353ms, Average = 167ms

- 9) Next, turn off the power to the Nitro board to check port 1.
 10) Change the Ethernet cable connection to the card's Ethernet port 1 (CN5).
 11) Turn on the power to the Nitro board.
 12) Use the “sof_download_ch1.bat”(*1) and “nios_download_ch1.bat”(*1) files in \sof_elf_ch1 to execute steps (6) to (8).

The operation of the card is confirmed after the ping is confirmed.
